

Dear Lightbearers Community,

It is with great honor and gratitude that we can be a part of the Science Of Being ~ Lightbearers Organization. This 2012 year looks to be an exciting one globally for the people of the World; for us it means new life as we birth the new Lightbearers Center in the Southern Hemisphere. We are privileged and full of joy to be of service bringing even more light into the lives of our community and to the people of New Zealand.

Here is a little bit about us: We live in the Hakarimata Ranges, near Hamilton, Central North Island, New Zealand and are very blessed to have a 32 acre property in the country, where we can focus on what we know to be our purposes in life--one of which is growing nutrient dense food in our organic vegetable garden which supports our raw food lifestyle. We strongly believe organic natural foods deliver optimum Life Force Energy for vibrant health and vitality and are vital for spiritual development. We have an orchard in place which is coming along nicely and is a yummy home for the bees we keep. One of our goals is to have our home and center be completely self sustainable and off the energy grid, and we wish to share that knowledge with others. We have only been here on our blessed land for a few years and as you can imagine it is a continual work in progress.

We have been studying and practicing the Science of Being wisdom since 2006. Since that time our spiritual journey has accelerated by applying the principles of Eugene Fersen's teachings. We look forward to sharing these teachings and spreading the message, along with other advanced spiritual practices that fit nicely with the Science Of Being.

In Light with Love,

Steve Weller & Kathy Just ~ CLB's

New Zealand Lightbearers Center is a private home and Lightbearers Center.  
Please call ahead before visiting.
